Reflexology

Reflexology is a relaxing way to ease areas of stress in the body. Reflexology works on the principle that our feet are 'mini maps' for the whole body, and that by relieving the body of stress and congestion, it restores the balance to promote the healing of both mind and body. A fantastic treatment for relaxation, as well as supporting people living with diabetes, chronic pain, MS, stress, IBS and more.

Hot Stones Reflexology

The doyen of deep relaxation, Hot Stones Reflexology combines Reflexology with gentle warmth from smooth basalt stones, which glide over the feet and lower legs. The heat helps to soften tight and aching muscles and as the warmth circulates throughout your body, any remaining tension melts away. Whether you are seeking some quality 'me time', have tired, aching muscles from physical exertion, manual occupations or participation in sport, without question, this treatment is for you.

(For this treatment, please wear loose fitting clothes that allow easy access to the lower legs)

Indian Head Massage

A beautifully soothing treatment including massage over the upper back, shoulders, arms, neck and scalp. Indian Head Massage stimulates the flow of blood, lymph and oxygen in your upper body, and can help to clear your sinuses, relieve stress, reduce the frequency and intensity of headaches and migraines, and improve the quality of your sleep.

Course of 6 sessions £150*

Access Bars®

Calm a busy mind and allow your body to release unwanted and unhelpful energy, and welcome ease, joy and harmony. Access Bars® involves gently holding 32 points on your head (the bars) which contain energy linked to all thoughts, beliefs, perceptions, and emotions, that you have stored in any lifetime. Post treatment, many people feel clearer, lighter and more focussed.

Ear Candling

A safe and gentle alternative to help clear sinuses, alleviate headaches and remove excess ear wax. During a relaxing Ear Candling treatment, it is common to hear soft hissing and crackling as by chimney effect, the candle draws out impurities from the ear. This treatment finishes with a cleansing lymphatic facial to improve lymphatic flow around the head and sinuses.
